

Chess Adventure

yeeeeee fellas!

Rules

- Each team gets a “Queen” piece on a 5x5 chessboard filled with questions (whose topics and difficulties are visible to everyone).
- Teams take turns choosing a new square to move to, and answering the corresponding question.
- If a team does not give the correct answer within the provided time (120 Seconds) they get negative marks (-10), and the question remains open for other teams.
- Question closes when a team answers it correctly (+20 for easy, +40 for hard).
- Teams can choose to move to squares whose question is already solved. In that case, they get zero points and next team gets their turn.
- More than two teams cannot be on the same square.
- Game finishes after each team gets 3 turns, i.e. after three rounds.
